

Part I: Mobile Devices

The Busy Attorney's Toolkit to "Mobile" Success

NBI, June 20, 2013

Professor Sara Anne Hook, M.L.S., M.B.A., J.D.

A. Trial Presentation Tools and Tricks

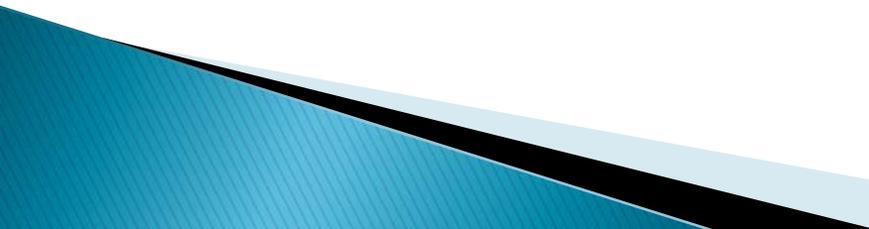

Everyone is Going Mobile!

- ▶ Lawyers and law firms have embraced mobile devices, particularly smartphones and iPads.

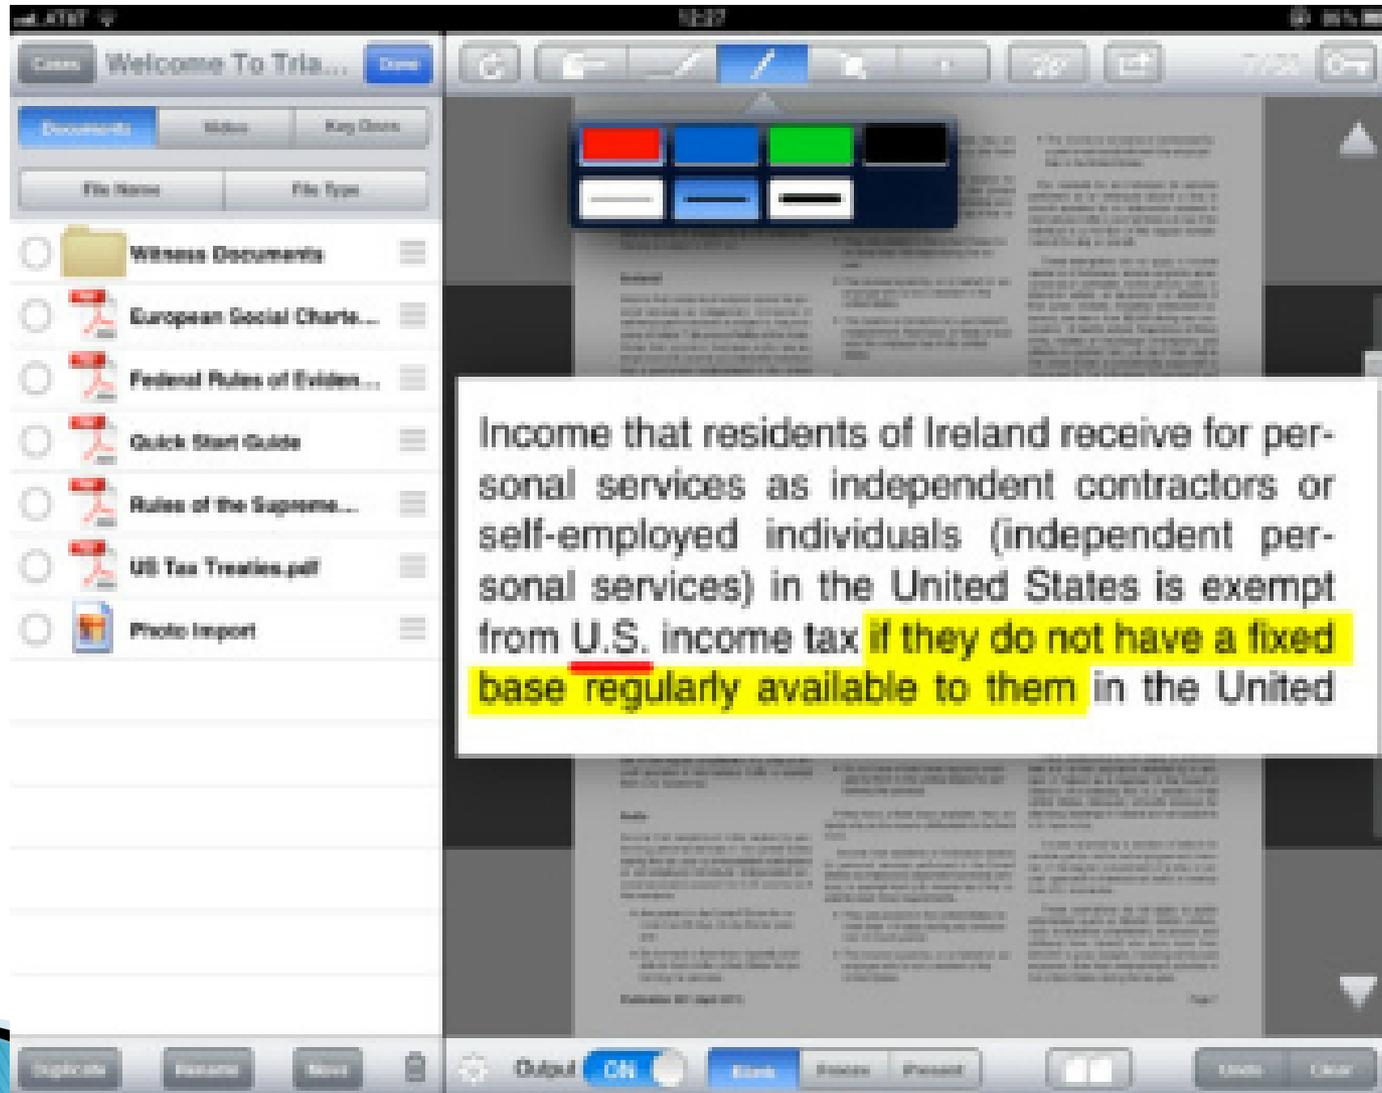

Nelson and Simek

- ▶ Have been leaders in legal technology, electronic discovery and computer forensics for many years, discusses the increasing use of iPads by lawyers to manage their demonstrative evidence and present their cases in court.
 - ▶ However, note the statement that “[m]ost lawyers still hire experts, not only to prepare exhibits but to present them” and that most lawyers are presenting demonstrative evidence electronically rather than through paper flip charts and foam boards.
 - ▶ As they state on page 2, “[d]emonstrative evidence has become a true specialty” and they discuss whether lawyers should hire experts or try to handle the technology themselves.
- 

TrialPad (iPad)

- ▶ TrialPad (iPad, \$89.99)
- ▶ [TrialPad](#) is a document presentation tool that lets you deliver convincing courtroom arguments without being tethered to a whiteboard or TV screen. First, lawyers can import photo, video or text evidence into individual case files. Then, during trial, they can use call-outs, annotation and highlighting to emphasize key information for jurors. If the price tag seems a little high, [Exhibit A](#) and [Evidence](#) offer similar features at a lower cost.

TrialPad

SmartDraw Software

- ▶ To create timelines, accident scene reconstructions, crime scene reconstructions, settlement brochures, courtroom presentation materials
- ▶ Easy to use – no artistic skills or graphic arts training required
- ▶ Inexpensive
- ▶ Can create in-house (as opposed to hiring outside consultants)
- ▶ Special Legal and Healthcare versions
- ▶ Can add animations (bullet trajectory)
- ▶ Can save as PowerPoint or PDF
- ▶ Can import photographs and maps – including from the Internet
- ▶ Symbols Libraries – and symbols can be customized and saved

SmartDraw Software

- ▶ Template Libraries – or blank templates – which can also be customized and saved
- ▶ Can add arrows, annotations, measurements, directions, dimensions, sound clips, directional arrows
- ▶ Can measure distances and areas
- ▶ SmartHelp, including step-by-step tutorials and FAQs
- ▶ View looking downwards plus cross-projection (walls)
- ▶ Intersection templates for accident reconstruction
- ▶ For crime scene, various body outlines, room templates (bedroom, kitchen, grocery store, office), hand and footprints, blood spatter, common items (broken glass, glove)

Crime Scene Areas - SmartTemplates

The image displays a grid of 15 SmartTemplate floor plan diagrams for crime scene reconstruction. The templates are arranged in three rows and five columns. The first row includes: Blank Crime Scene (Indoor), Blank Crime Scene (Outdoor), Apartment, Bathroom (Master), and Bedroom. The second row includes: Conference Room, Cubicle, Dining Room, Garage, and Grocery Store. The third row includes: Kitchen, Living Room, and two other diagrams. The 'Bedroom' template in the first row is highlighted with a yellow border. Each diagram is a black and white line drawing showing the layout of a room with various furniture and fixtures.

The diagram shows a rectangular garage labeled "GARAGE" in the center. A car is parked on the right side. At the top left, a house is labeled "HW" with an arrow pointing "TO HOME". At the bottom, there are two garage doors labeled "SINGLE GARAGE DOOR" and "DOUBLE GARAGE DOOR". A ruler at the top and left indicates measurements from 0 to 140 units. The interface includes a top menu bar, a ribbon with various tool groups, a left sidebar with a symbol library, and a right sidebar with registration and help options.

iPAD in the Courtroom

An article from *Indiana Lawyer* explains how to share the iPad's display on a big screen during trial using a wireless connection. (Bour, S. Display your iPad on the big screen at trial. *Indiana Lawyer*, May 8-21, 2013, p. 6)

B. Apps: Who Has the Most Selection for Lawyers?

A Difficult Question – A Moving Target!

- ▶ With the speed of technology development and given the popularity of apps, it is difficult to provide accurate figures on the number of law-related apps available for specific devices.
- ▶ However, Narkiewicz notes that “iPad is the tablet of choice by the overwhelming number of lawyers who use tablet computers.”
- ▶ He goes on to state that while tablet computers that currently use the Android and Windows operating systems are certainly viable alternatives to the iPad, the iPad “has by far the most applications (apps) available specifically for lawyers or valuable to lawyers.” (Id.)

Continued

- ▶ He goes on to comment that all apps for the iPad can be easily purchased from the Apple Store directly from the iPad with a connection to the Internet and an Apple account.
- ▶ He then provides a useful comparison between the iPad 2 and the new iPad based on specifications such as size and weight, Wi-Fi or cellular connections, storage, display, voice, operating system, camera and battery life.
- ▶ He states that there are more than 225,000 apps available from the Apple App Store specifically for the iPad and another 250,000 made for the iPhone that will work on the iPad, although the display of these apps may not be ideal on an iPad.

Lots of Choices for Lawyers

- ▶ In terms of the various law-related functions that can be performed using an iPad and its apps with satisfactory results are note taking, organizing case files, document creation, review and revision, spreadsheets and presentations and time and billing.
 - ▶ Additional insight into the use of smartphones and tablets by lawyers and law firms will be available later in 2013 through a six-volume survey being published by the American Bar Association's Legal Technology Research Center.
 - ▶ Volume VI on *Mobile Lawyers*, will be available in July.
 - ▶ An executive summary of all of the volumes will be published in August.
- 

C. Security Risks

Risks from Mobile Devices

- ▶ A number of recent articles should heighten an attorney's awareness of the significant risks to information security and confidentiality posed by the use of mobile devices as well as cloud computing vendors.
 - ▶ Often, the issue is not the technology itself, but human behavior that causes mobile devices to be lost or stolen at alarming rates.
 - ▶ Law firms are only beginning to grapple with some of these issues.
- 

What the Experts Say

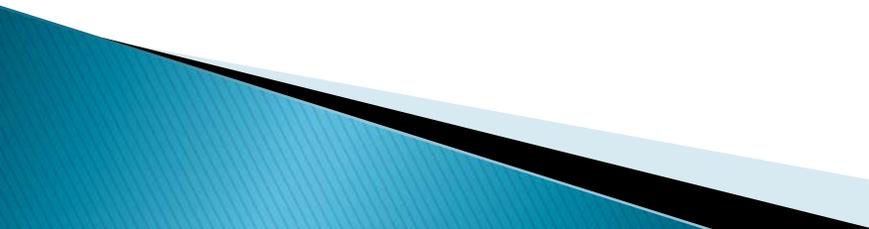

Nelson and Simek, experts in information security, provide the following recommendations for security when using smartphones, with a reminder that attorneys have an ethical obligation to protect confidential client information:

1. Encryption
2. Encrypt Expansion Memory
3. Lock Code
4. Inactivity Timer
5. Location Services
6. Remote Wipe
7. Security Software
8. URLs and QR Codes
9. Wireless Networks
10. Update Your Device
11. Don't Jailbreak or Root
12. Application Installations
13. Terms of Service
14. Turn Off Unneeded Interfaces
15. Mobile Device Manager
16. Backup

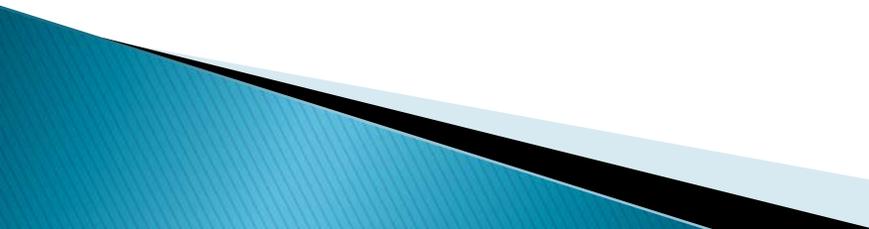

Nelson and Simek

- ▶ Note that data can be written to a smartphone without the user's knowledge and that just opening and reviewing a document can result in the document being written to the phone, especially an iPhone.
- ▶ They also advise attorneys to be aware of the changes to the ABA Model Rules of Professional Conduct because under the revisions to the Rules (as part of the Ethics 20/20 project), attorneys are now required to use technology competently and to assess the risks of any particular technology and the sensitivity of the data being handled as it relates to the measures being taken to secure the data.

Delete Data Securely

- ▶ Another article by Nelson and Simek covers how to securely delete data from mobile devices.
 - ▶ Sensei Enterprises offers a variety of services related to mobile device/phone forensics, noting that these devices can hold a wealth of information that can be extracted, such as text messages, pictures, videos, call logs, emails and contacts.
 - ▶ Their website outlines three levels of recovery from these devices, noting that it is possible to recover deleted information even if the device has been deactivated from service.
- 

BYOD – Bring Your Own Device

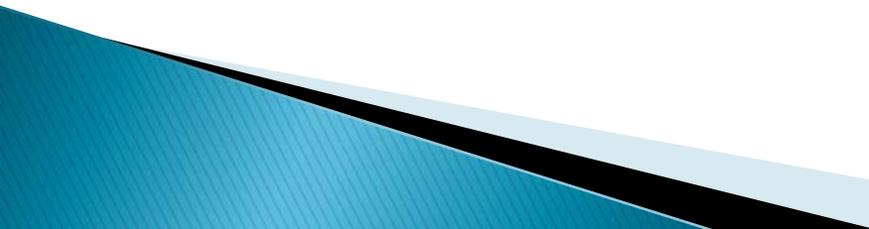

- ▶ Murphy also discusses the impact of increasing use of mobile devices by lawyers and law firm employees, especially the trend towards employees purchasing their own devices and then using these personal devices to perform their duties, what is now referred to as the “bring your own device” (BYOD) revolution.
 - ▶ Blurring of personal and business computing is creating special challenges for law firms and their IT departments, including security as an afterthought, data contamination, mobile malware, phishing attacks that can bypass network defenses, lost devices and risky file sharing.
 - ▶ Advocates using a security file-sharing solution which can shield confidential data from unauthorized access and from malware that may have infected other files on the device.
- 

More from Murphy

Five top ways to protect the law firm's data on mobile devices:

- “Chose a solution that protects all confidential files on all devices.
 - Centralize control and monitoring.
 - Connect to SharePoint and other systems for matter centricity.
 - Use private, not public, clouds.
 - Nudge users to safety.”
- 

Mobile Device Management (MDM)

- ▶ Beck notes that the data being stored on mobile devices continues to grow because of email messages and attachments, text messages and other instant messaging services, app data, multimedia files and metadata.
 - ▶ Proper mobile device management (MDM) begins with information governance, including policies and standards.
 - ▶ Essential MDM technical controls covered in his article include asset management, configuration management, encryption and remote secure wipe.
 - ▶ Advanced MDM solutions can include data leakage protection, remote auditing, advanced support options and backups and restores.
- 

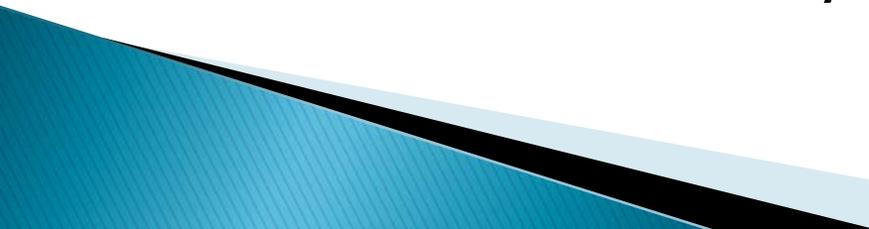

MDM for Law Firms

Magliato also provides helpful advice for lawyers and law firms for mobile device management (MDM) in the age of BYOD.

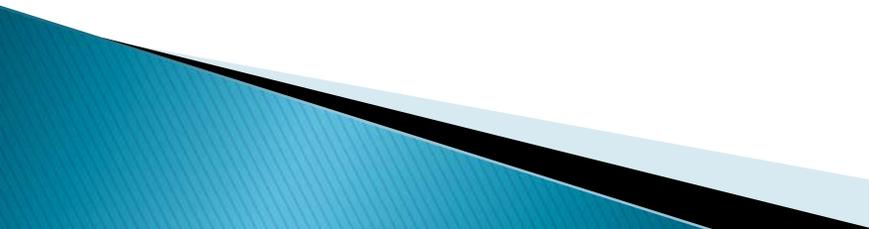

A fully managed mobility solution should address the following characteristics:

- “Software Distribution
- Policy Management
- Inventory Management
- Security Management
- Encryption
- MDM Access to Business Applications
- Data Loss Prevention”.

But Security Still Depends on People

- ▶ Mobile devices prone to being lost or stolen – a major cause of data breaches and other security/privacy incidents
 - ▶ People also continue to fall victim to the tactics of social engineering, which Carlson and Wolf define as manipulating people into disclosing information or performing tasks. (Most famous hacker used this 90% of the time.)
 - ▶ Their article discusses the importance of training lawyers and their staff members about information security threats.
- 

Carlson and Wolf

- “Law firms are being targeted by hackers (by beginning hackers, as practice for more robust targets)”
 - Specific data are considered confidential by the law firm
 - The law firm has policies and procedures
 - Email messages might be phishing attempts
 - There is a safe way to surf the web
 - Social networks can be inaccurate
 - Social engineering comes in many forms
 - Passwords need to stay secure
 - Personal devices require security measures
 - There are people available for support
 - Security needs to be a shared responsibility”
- 

Carlson and Wolf

- ▶ Among the recommendations the authors provide for designing a training program for lawyers and law firm staff members are:
 - “Don’t try to cover everything at once
 - Use different approaches
 - Provide a range of times and opportunities
 - Use threat-based scenarios or real-world examples
 - Do not exaggerate
 - Look for opportunities to “train the trainers”
 - Ask for feedback”

Best Practices from Kimbro

- ▶ “Use full disk encryption on all computers.
 - ▶ Create strong passwords. Change them occasionally. Make sure username and passwords are not written down or are not easily viewable or accessible.
 - ▶ Use a daily backup system.
 - ▶ Keep antivirus software up-to-date and a firewall in place.
 - ▶ Use antimalware protection.
 - ▶ Use a pop-up blocker, depending on the browser you use. (Firefox is recommended with the use of security add-ons.)
- 

Continued

- ▶ Have a secondary, backup Internet method, such as a wireless AirCard.
- ▶ Secure your wireless.
- ▶ Remove metadata before transmitting documents.
- ▶ Educate and remind your online clients about protecting themselves using their own hardware.”
- ▶ Other suggestions from Kimbro are to know your state’s ethical rules, especially related to your law firm’s website, obtain adequate malpractice insurance and purchase insurance for your hardware .

Hot Off the Press

- ▶ Article on kill switches
 - ▶ Article on safeguarding data by Tim Altom
 - ▶ Article on risks from BYOD – Bring Your Own Device
 - ▶ Article on managing the security and privacy of data in a law office – from *Michigan Bar Journal*, June 2013
- 

D. Comparison of Devices and Features

Comparing Devices and Features

- ▶ There are many comparisons of smartphones and tablets.
 - ▶ Continued advances in this technology and competition in the marketplace means that this is a moving target.
 - ▶ Fortunately, current information on the specifications of various devices and detailed information comparing these devices is readily available through a simple search of the web.
 - ▶ Attorneys will also want to be sure that they are consulting the most up-to-date information and reviews.
- 

Comparison of Smartphones

- ▶ Jack Wallen provided the following comparison of four smartphones (Wallen, J. Leading smartphone feature-to-feature comparison chart. TechRepublic <http://www.techrepublic.com/blog/smartphones/leading-smartphone-feature-to-feature-comparison-chart/6676>, accessed 5/10/13). See chart in seminar manual.
- ▶ A comparisons can also be found on the websites for The Kim Komando Show (Smartphone Comparison Chart, <http://www.komando.com/charts/smartphones.asp>, accessed 5/10/13),
- ▶ ComparedandReviewed.com (Smartphones, <http://www.comparedandreviewed.com/smartphones>, accessed 5/10/13), and

Comparison of Smartphones

- ▶ Wikipedia (Comparison of Smartphones, http://en.wikipedia.org/wiki/Comparison_of_smartphones, accessed 5/10/13).
- ▶ One of the nice features of the Wikipedia comparison is that it covers devices over nearly a decade and also includes a chart for networks and connectivity.
- ▶ An article from FoxNews.com by Kim Komando lists the top seven best smartphones available with commentary on why these are especially good choices (Komando, K. 7 best smartphones today. FoxNews.com, March 23, 2013, <http://www.foxnews.com/tech/2013/03/23/7-best-smartphones-today/>, accessed 5/10/13).

Komando Recommends

- ▶ HTC One
 - ▶ iPhone 5
 - ▶ HTC 8X
 - ▶ Nexus 4
 - ▶ Samsung Galaxy Note II
 - ▶ Samsung Galaxy S4
 - ▶ LG Optimus G
- 

The Pros and Cons of Tablets

- ▶ The tablets are easy to personalize, carry around and flexible to use
 - ▶ The interface of the tablets is ideal for a good gaming experience and watching HD movies
 - ▶ With the increasing megapixel count and better optics, tablets can be used as cameras as well
 - ▶ Tablets offer a good battery backup that last between six to ten hours on continuous usage
 - ▶ The tablets barely have any storage with a maximum of 64GB storage both for onboard and expandable
 - ▶ Typing long documents can prove to be difficult”
- 

The Pros and Cons of Smartphones

- ▶ They are now being introduced in larger screens that has increased the competition between tablets and smartphones
 - ▶ Almost all of the high end smartphones feature a camera that is 8 megapixel or above which helps capturing quality images
 - ▶ Its touchscreen QWERTY keypad is easier to use
 - ▶ In some leading brands the screen of the smartphone can split for watching videos while working
 - ▶ HD display is ideal for gaming and watching videos
 - ▶ Options like; Push mail support, chat messages are just a touch away
 - ▶ Not many applications are available to optimize the functioning of its multi-core processor
 - ▶ The smartphones have to constantly catch up with their operating systems”
- 

Comparison of Tablets

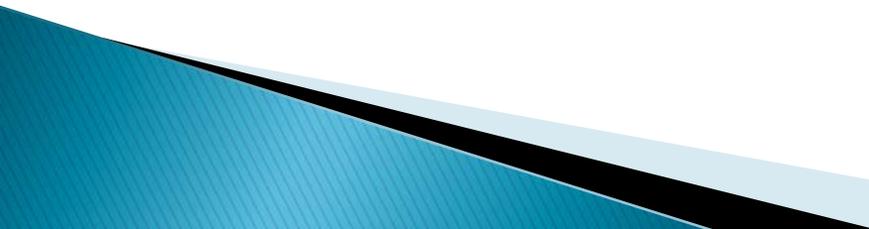

- ▶ There are a number of websites that provide up-to-date comparisons of tablet computers and this is likewise a moving target as the technology improves and competition drives vendors to add more features and functionality that will be useful and appealing.
 - 2012 Tablet Comparison Guide, which offers a comparison of the seven most popular tablets of the holiday season (Shanklin, W.: 2012 Tablet Comparison Guide, November 5, 2012, <http://www.gizmag.com/tablet-comparison-2012/24877/>, accessed 5/13/13)
 - The 2013 Best Tablet Side by Side Comparisons and Reviews (Top Ten Reviews, <http://tablets-review.toptenreviews.com/>, accessed 5/13/13)
 - Wikipedia – Comparison of Tablet Computers (http://en.wikipedia.org/wiki/Comparison_of_tablet_computers, accessed 5/13/13).

Part II: Top Legal Research Apps

The Busy Attorney's Toolkit to "Mobile" Success

Mobile App for Casemaker

- ▶ For iPhones, iPads and Android phones and tablets
- ▶ Part of the subscription

The screenshot shows a web browser window with the URL <http://www.casemakerlegal.com/subscribeMob>. The page features the Casemaker logo and the tagline "THE LEADER IN LEGAL RESEARCH™". The main content area contains the following text:

- Please register below to get your mobile app reference code.
- Go to Google Play or iStore on your mobile device
- Search for casemaker or casemakerlegal
- Download the application

Apple users can also download the application from [here](#)

The first time you run the application, it will ask for the reference code. Please enter the reference code provided when you registered below for the Mobile application. (you can use this code on maximum of three devices). you are now ready to use the new casemakerlegal application for android &/or apple phones. If you have any questions please call customer service at **1-877-659-0801**.

If you subscribe to CC+ you will have access to that on your Mobile phone also.

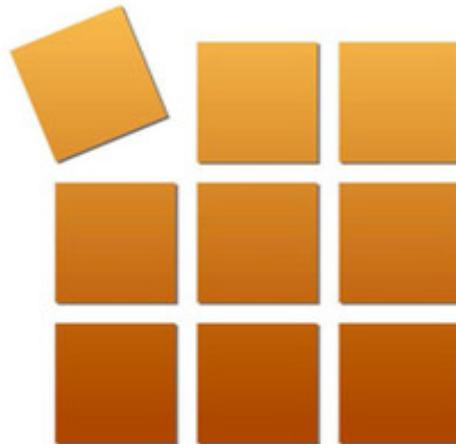

Thank you for using casemakerlegal.

Below the text is a form with a label "First name" and an empty input field.

Wolfram Lawyer's Professional Assistant – \$4.99

- ▶ Stephan Futeral considers this to be the "Swiss Army Knife" of legal reference apps.
- ▶ This app includes a legal dictionary, the statute of limitations for each U.S. state, various financial calculators including a fees calculator, a settlement calculator, and a calculator to compute the historical value of money, a blood alcohol calculator, and many more.
- ▶ The app displays crime rates including state and national comparisons, investigative information including weather, company information, computations for cost of living, life expectancy, present or future values, mortgage calculators, and much, much more.

Wolfram Lawyer's Professional Assistant – iPhone or iPad

The screenshot shows a web browser window displaying the Wolfram Professional Assistant website. The browser's address bar shows the URL <http://products.wolframalpha.com/professional>. The website header includes the WolframAlpha logo and a search bar. The main navigation menu is divided into sections: Mobile & Tablet Apps, Overview, Course Assistants, Reference Apps, Professional Assistants (highlighted), and Personal Assistants. Below the navigation, there is a link to 'All Professional Assistant Apps'. The featured app is 'Lawyer's Professional Assistant', which is available for iPhone and iPad. A 'Buy Now' button is prominently displayed. The app's description includes a list of features: a dictionary of legal terms, statutes of limitations for each US state, information about visa types, calendar computations, financial computations, and crime rates and histories. The bottom of the screenshot shows the Windows taskbar with various application icons and the system clock indicating 3:32 PM on 6/19/2013.

« All Professional Assistant Apps

Lawyer's Professional Assistant | for iPhone & iPad

[Buy Now »](#)

- A dictionary of legal terms; statutes of limitations for each US state; and information about visa types, including requirements, common issues, and extensions and limits
- Calendar computations to quickly determine the end date of a specific term
- Financial computations, including fee calculations, settlement calculations, current interest rates, historical value of money, and federal US tax rates
- Crime rates and histories for specific crimes, as well as state and national average comparisons

Lawstack – see iTunes

- ▶ Free
 - ▶ Lawstack gives you access to the U.S. Constitution, Federal Rules of Civil, Criminal, Appellate and Bankruptcy Procedure, Federal Rules of Evidence, CFR, and several state codes.
 - ▶ For both iPhone and iPad.

ABA Journal – from iTunes

The screenshot shows a web browser window displaying the iTunes app page for 'ABA Journal for iPhone/iPad'. The browser's address bar shows the URL 'https://itunes.apple.com/us/app/aba-journal-fc'. The page features a blue header with the app name and developer information. Below the header is a large blue square icon with a white letter 'A'. To the right of the icon is a 'Description' section with text about legal news updates. Below the description are links to the American Bar Association website and app support. A 'What's New in Version 3.1.1' section is also visible, mentioning a fix for iPads on older iOS versions. At the bottom of the page, there is a 'View In iTunes' button and a note that the app is designed for both iPhone and iPad. The browser's taskbar at the bottom shows various application icons and the system clock indicating 3:44 PM on 6/19/2013.

Legal Heavyweights List Less Obvious Picks to Replace Stevens

By Debra Cassens Weiss
2 hours, 13 minutes ago

There is lots of speculation surrounding **three possible nominees** to replace Justice John Paul Stevens: Solicitor General Elena Kagan and federal appeals judges Diane Wood and Merrick Garland. But what about the less-obvious possibilities?

Slate contacted a number of legal
