Overview

Giving to Environmental and Animal Organizations

Based on data collected in 2009 about giving in 2008
This analysis is available to Premium Service Subscribers of the Lilly Family School of Philanthropy at Indiana University. To subscribe, go to www.philanthropy.iupui.edu.

The Philanthropy Panel Study (PPS) is a module of the Panel Study of Income Dynamics (PSID), which reaches more than 8,000 households every two years. The PSID is fielded by the Institute for Social Research at the University of Michigan. Questions were asked in 2009 about giving in 2008.

The School of Philanthropy thanks Atlantic Philanthropies for the initial funding to launch PPS in 2001 and the donors whose recent contributions make continued waves of PPS possible.

Recent donors include:
Bill & Melinda Gates Foundation
Charles Stewart Mott Foundation
John Templeton Foundation
United Nations Foundation

To contribute, please contact Lisa Viaches (lviaches@iupui.edu) or give online at www.philanthropy.iupui.edu/give-now and select “School of Philanthropy Research Funding.”
Acknowledgments

The analyses presented here are made possible by the work of many people, including:

Founding Director of the Philanthropy Panel Study, Mark Ottoni-Wilhelm

At the Lilly Family School of Philanthropy at Indiana University:
Gene R. Tempel, Founding Dean
Patrick M. Rooney, Associate Dean for Academic Affairs and Research
Una O. Osili, Director of Research
Amy N. Thayer, Associate Director of Research
Amir D. Hayat, Applied Statistician
Grace Baranowski, Research Associate
Yuan Cheng, Graduate Student Intern
Traci Wilmoth, Research Assistant
Thomas Pearson, Research Assistant
Jon Bergdoll, Research Assistant
Denay Patterson, Research Assistant
Melissa Wall, Research Assistant
Riley Mineart, Research Assistant

Permission is granted to use, circulate, and cite figures in this pamphlet with attribution to the Philanthropy Panel Study.

For more information about the Philanthropy Panel Study, please see the School’s website at www.philanthropy.iupui.edu.

Overview of Environmental and Animal Giving

A number of demographic factors play a role in how much households and individuals give to charity. The graphs in this overview provide comparisons of giving to environmental and animal organizations by:

- Age (<=40, 41-64, and 65+)
- Income (<=$50,000, $50,001 - $99,999, and $100,000+)
- Wealth, excluding the equity in a home (<=$50,000, $50,001-$199,999, and $200,000+)
- Education level of the head of household (high school or less, some college, bachelor's degree, and graduate school)
- Geographical location, using regions of the United States defined by the U.S. Census Bureau
- Marital status of the head of household (married, never married, widowed, separated, and divorced)

This overview uses the 2009 wave of the Panel Philanthropy Study (PPS) data, a module of the Panel Study on Income Dynamics (PSID), to make inferences about household charitable giving in the United States. The PPS is the nation's first and largest ongoing study examining the charitable giving of American households over time. This overview uses the nationally representative data from PPS to present some key facts about charitable giving based on responses provided by households in 2008, drawing on demographic characteristics of U.S. donor households. This report presents the giving rate (the percentage of U.S. households that gave) and the average and median gift amounts among U.S. donor households to environmental and animal organizations.

In general, the higher the number of respondents in a group, the more reliable the result (the more likely the same result would be found if we had an opportunity to conduct the same study repeatedly with multiple representative samples at the same time). Statistics calculated for a group with fewer than 100 observations are starred in this report in order to indicate that the result should be interpreted with caution. Moreover, the analysis presented in this report does not control for any other variable.

Households that answered the philanthropy questions were asked first if they made charitable donations totaling $25 or more in 2008. Households responding “yes” were asked further questions about how much they gave to each of 11 different types of charities. Nearly 8,700 households participated in the 2009 wave of the PSID. The analysis for this report is based on the 8,475 households that responded to the philanthropy questions. In our analysis, we used the sampling weights provided by the PSID research team at the University of Michigan to yield nationally representative results.

Overview of Giving to Environmental and Animal Organizations in 2008

<table>

</table>

- 9.2 percent of all U.S. households gave to environmental and animal organizations in 2008
- $215 was the average giving amount to environmental and animal organizations per U.S. donor household
- $100 was the median giving amount to environmental and animal organizations per U.S. donor household
Giving Rate to Environmental and Animal Organizations by Head of Household's Age Group

This graph shows the giving rate of U.S. households to environmental and animal organizations in 2008 by the age group of the head of household.

- Households headed by an older individual gave at higher rates to environmental and animal organizations.

- 5.8 percent of households headed by an individual 40 or younger gave to environmental and animal organizations which is 4.7 percentage points lower than the giving rate to environmental and animal organizations of households headed by an individual 41 to 64 years old.

- A 1.4 percentage point difference separated the giving rates to environmental and animal organizations of households headed by an individual 41 to 64 years old and households headed by an individual 65 or older.

- Overall, 9.2 percent of responding households contributed to environmental and animal organizations in 2008.
This graph shows the average and median giving amounts to environmental and animal organizations in 2008 by the age group of the head of household, among U.S. donor households.

- Though households headed by older individuals gave at higher rates to environmental and animal organizations, those that gave did not necessarily donate higher average or median amounts to environmental and animal organizations. In fact, donor households headed by younger individuals gave slightly more on average to environmental and animal organizations.

- Among those that gave, donor households headed by an individual 65 or older gave the lowest average and median amounts to these organizations compared to the other age groups.

- Among all U.S. donor households, the average total gift to environmental and animal organizations was $215 (median=$100).
This graph shows the giving rate of U.S. households to environmental and animal organizations in 2008 by household income level.

- Households with higher income levels gave at higher rates to environmental and animal organizations in 2008.

- The giving rate to environmental and animal organizations of households with income levels between $50,001 and $99,999 was 7.0 percentage points lower than the giving rate of households with income levels of $100,000 or more.

- The giving rate to environmental and animal organizations of households with income levels of $50,000 or less was 4.3 percentage points less than the giving rate of households with income levels between $50,001 and $99,999.

- Overall, 9.2 percent of responding households contributed to environmental and animal organizations in 2008.
This graph shows the average and median giving amounts to environmental and animal organizations in 2008 by household income level, among U.S. donor households.

- Among those that donated, households with greater incomes gave higher average and median gift amounts to environmental and animal organizations in 2008.

- Among those that donated, households with income levels between $50,001 and $99,999 gave nearly twice as much on average than households with income levels of $50,000 or less to environmental and animal organizations.

- Among those that donated, households with income levels of $100,000 or more donated nearly three times as much on average than households with income levels of $50,000 or less to environmental and animal organizations.

- Among all U.S. donor households, the average total gift to environmental and animal organizations was $215 (median=$100).
This graph shows the giving rate of U.S. households to environmental and animal organizations in 2008 by household wealth level. For this analysis, wealth did not include the value of the equity in the household home.

- Households with higher wealth levels gave at higher rates to environmental and animal organizations.

- The giving rate to environmental and animal organizations of households with wealth levels of $50,000 or less was 11.7 percentage points less than that of households with wealth levels of $200,000 or more.

- Three percentage points separated the giving rates to environmental and animal organizations of households with wealth levels between $50,001 and $199,999 and households with wealth levels of $200,000 or more.

- Overall, 9.2 percent of responding households contributed to environmental and animal organizations in 2008.
Giving to Environmental and Animal Organizations by Household Wealth Level

This graph shows the average and median giving amounts to environmental and animal organizations in 2008 by household wealth level, among U.S. donor households. For this analysis, wealth did not include the value of the equity in the household home.

- Households with higher levels of wealth not only gave at higher rates to environmental and animal organizations, but those that did give donated larger average gifts.

- Donor households with wealth levels of $50,000 or less gave less on average to environmental and animal organizations but gave a higher median gift amount than donor households with wealth levels between $50,001 and $199,999.

- Among all U.S. donor households, the average total gift to environmental and animal organizations was $215 (median=$100).
Giving Rate to Environmental and Animal Organizations by Head of Household’s Education Level

This graph shows the giving rate of U.S. households to environmental and animal organizations in 2008 by education level of the head of household.

- Households headed by more highly educated individuals gave at higher rates to environmental and animal organizations.

- An 8.5 percentage point difference separated the giving rates to environmental and animal organizations of households headed by an individual with a bachelor’s degree and households headed by an individual with at least some graduate coursework.

- Households headed by an individual with a high school education or less gave at the lowest rate—4.4 percent—to environmental and animal organizations, which was 4.8 percentage points lower than households headed by an individual with some college education.

- Overall, 9.2 percent of responding households contributed to environmental and animal organizations in 2008.
Giving to Environmental and Animal Organizations by Head of Household’s Education Level

- Generally, donor households headed by individuals with higher levels of education gave larger average gift amounts to environmental and animal organizations.

- As the exception to this trend, donor households headed by an individual with some college education gave $35 more on average to environmental and animal organizations than donor households headed by an individual with a bachelor’s degree.

- Among those that gave, households headed by an individual with at least some graduate coursework gave $302 on average to environmental and animal organizations. This was the highest average gift amount among all education levels.

- Among all U.S. donor households, the average total gift to environmental and animal organizations was $215 (median=$100).

---

*HS or Less -- high school education or less

*BA/BS -- bachelor’s degree

This graph shows the average and median amounts given to environmental and animal organizations in 2008 by education level of the head of household, among U.S. donor households.
This graph shows the giving rate of U.S. households to environmental and animal organizations in 2008 by U.S. geographic region.

- A difference of 11.6 percentage points separated the region with the highest giving rate to environmental and animal organizations (North East) and the region with the lowest (East South Central).

- Overall, 9.2 percent of survey respondents contributed to environmental and animal organizations in 2008.

- The regions as defined by the U.S. Census Bureau, are described below.

<table>
<thead>
<tr>
<th>Region</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>North East</td>
<td>Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont</td>
</tr>
<tr>
<td>Mid Atlantic</td>
<td>New Jersey, New York, Pennsylvania</td>
</tr>
<tr>
<td>East North Central</td>
<td>Illinois, Indiana, Michigan, Ohio, Wisconsin</td>
</tr>
<tr>
<td>West North Central</td>
<td>Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota</td>
</tr>
<tr>
<td>South Atlantic</td>
<td>Delaware, Florida, Maryland, Georgia, North Carolina, South Carolina, Virginia, Washington, DC, West Virginia</td>
</tr>
<tr>
<td>East South Central</td>
<td>Alabama, Kentucky, Mississippi, Tennessee</td>
</tr>
<tr>
<td>West South Central</td>
<td>Arkansas, Louisiana, Oklahoma, Texas</td>
</tr>
<tr>
<td>Mountain</td>
<td>Arizona, Colorado, Idaho, Montana, New Mexico, Nevada, Utah, Wyoming</td>
</tr>
<tr>
<td>Pacific</td>
<td>Alaska, California, Hawaii, Oregon, Washington</td>
</tr>
</tbody>
</table>
This graph shows the average and median amounts given to environmental and animal organizations by U.S. geographic region, among U.S. donor households.

- The East South Central region not only gave at the lowest rate to environmental and animal organizations, but those that gave also donated the lowest amount on average.

- Among all donating households, the average total gift to environmental and animal organizations was $215 (median=$100).

- Region definitions can be found on the previous page.
This graph shows the giving rate of U.S. households to environmental and animal organizations in 2008 by marital status of the head of household.

- The giving rate to environmental and animal organizations of households headed by a married individual was 6.7 percentage points higher than that of households headed by a separated individual, which was the marital status group with the lowest rate of giving to environmental and animal organizations.

- The giving rate to environmental and animal organizations of households headed by a married individual was only 0.6 percentage points higher than that of households headed by a widowed individual.

- Overall, 9.2 percent of responding households contributed to environmental and animal organizations in 2008.
Giving to Environmental and Animal Organizations by Head of Household’s Marital Status

- Though households headed by a separated individual gave at the lowest rate to environmental and animal organizations, those that did give donated the largest median gift amount.

- Donor households headed by a divorced individual gave $12 more, on average, to environmental and animal organizations as compared to donor households headed by a separated individual.

- Among those that gave, households headed by a married individual gave $84 more on average to environmental and animal organizations than households headed by a divorced individual.

- Among all U.S. donor households, the average total gift to environmental and animal organizations was $215 (median=$100).

*Sample size is relatively small. Results should be interpreted with caution.*

This graph shows the average and median giving amounts to environmental and animal organizations by the marital status of the head of household, among U.S. donor households.
